

Data Flow Diagram — Context Diagram (Level 0)

FreshBakes Bakery | IS501 Project

The context diagram presents the FreshBakes Web System as a **single process** surrounded by all external entities that interact with it. This establishes the system boundary and shows every external actor plus the direction and nature of each data flow.

External Entities: Customer, Baker, Admin/Owner, Delivery Staff, Stripe (Payment Gateway), Email Service

Data Flow Summary

From	To	Data
Customer	System	Order details, payment authorisation
System	Customer	Order confirmation, real-time status, loyalty balance
Baker	System	Order status updates, delay flags, stock queries
System	Baker	Prioritised order queue, custom cake specs, stock alerts
Admin	System	Menu changes, inventory adjustments, user management
System	Admin	Sales reports, dashboard data, reorder alerts
Delivery Staff	System	Delivery completion confirmations
System	Delivery Staff	Delivery assignments, route information
System	Stripe	Payment requests
Stripe	System	payment_intent.succeeded webhook events

From	To	Data
System	Email Service	Transactional notification triggers
