

Flowchart — Order Fulfillment Process

FreshBakes Bakery | IS501 Project

This flowchart traces the complete journey of a customer order from placement through to fulfillment. It includes the critical **stock availability check**, **Stripe payment handling**, **inventory deduction**, and the **collection vs. delivery** branch.

Process Steps Summary

Step	Decision / Action	System Requirement
Stock check	Is every item in the basket available?	SR-F08 — blocks checkout when stock = 0
Payment	Stripe checkout; retry on failure	SR-F10 — logs all payment outcomes
Webhook received	payment_intent.succeeded triggers backend	SR-F01 — atomic inventory deduction
Inventory deduction	Stock decremented immediately on payment	SR-F01
Order reference	Unique reference generated per confirmed order	SR-F03
Loyalty points	Points awarded at order completion rate	SR-F06
Confirmation email	Dispatched within 30 seconds of payment	SR-F02
Baker queue	Order appears in dashboard (auto-refresh every 30 s)	SR-F04
Collection branch	Customer notified when order is ready	SR-F09 status: Ready
Delivery branch	Admin assigns to driver; staff marks delivered	SR-F09 status: Out for Delivery → Delivered
